Since July 1, 2011, Gautier Semences has been accredited with GSPP: Good Seed and Plant Practices. GSPP is an international, transparent business chain system whose purpose is to prevent tomato seed and plant lots from being infected by *Clavibacter michiganensis* subsp. *michiganensis* (Cmm). This accreditation covers the entire process of design and production of varieties. This accreditation demonstrates the commitment of all teams in Gautier to deliver the highest level of quality on the market.

Recommended crop:  Heated soilless greenhouse  Heated greenhouse  Unheated greenhouse  Open field

Possible crop:  Heated soilless greenhouse  Heated greenhouse  Unheated greenhouse  Open field

The standard abbreviations

ToBRFV : Tomato brown rugose fruit virus
ToMV : Tomato mosaic virus
TSWV : Tomato spotted wilt virus
TYLCV : Tomato yellow leaf curl virus
Pf : Passalora fulva (ex Fulvia fulva)
Fol : Fusarium oxysporum f.sp. lycopersici
For : Fusarium oxysporum f.sp. radicis-lycopersici

On : Oidium neolyopersici
Va : Verticillium albo-atrum
Vd : Verticillium dahliae
PI : Pyrenochaeta lycopersici
Ma : Meloidogyne arenaria
Mi : Meloidogyne incognita
Mj : Meloidogyne javanica

 High/standard resistance

 Intermediate/moderate resistance

* AMANTYNO HF1 : Licensed variety

The varieties presented under a number are available for testing until their registration in the official catalogue.

The advice and suggestions, as well as the information mentioned above, are provided for guidance only and can not therefore provide a guarantee of results.

All varieties illustrated in this paper were photographed under favourable conditions : their behaviour can vary depending on culture conditions.

An extensive offer to address the entire sector

Facing the major challenges of the tomato industry, we reaffirm our determination to support market developments and meet the expectations of growers, distributors, and consumers.

In 2023, we launched our first ToBRFV-resistant varieties. This year, we are expanding our range with new varieties, carefully developed with meticulous attention to their taste quality.

Our mission to our grower partners is clear: to meet the ambitious dual challenge of resistance and taste, to provide maximum safety in cultivation while retaining the taste qualities of the varieties that make them successful among consumers.

Our range is one of the most extensive on the market, with more than 10 different types. This diversity allows us to offer solutions tailored to your various needs and diversification goals.

By choosing Gautier Semences, you are selecting a committed partner, resolutely determined to meet the needs of the industry. Together, let us cultivate sustainable solutions for the tomato sector.
